

# Environmental, Health & Safety Compliance Audit

## Your Audit Results

### *A Valuable Decision-Making Tool.*

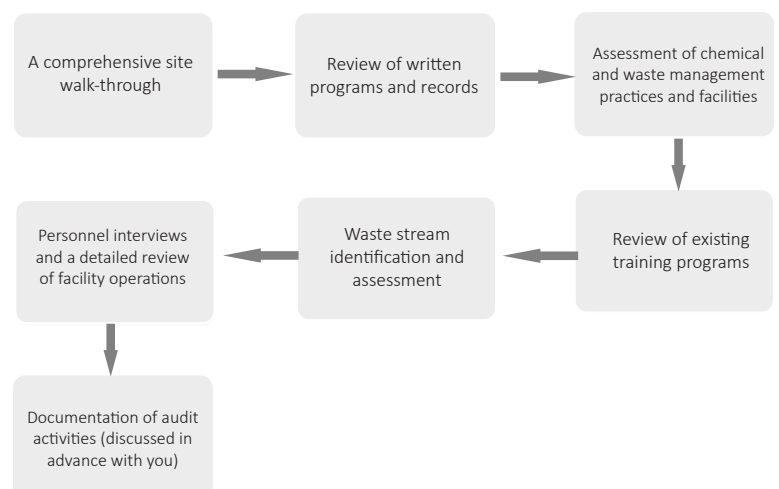

Your audit results are compiled in a concise technical report and/or compliance matrix that summarizes applicable regulatory citations or programs, describes findings, and proposes specific modification recommendations. We will help you to prioritize these findings, allowing you to address the most business-critical compliance issues first.

## EHS Compliance Audit Services

EHS (Environment, Healthy & Safety) Compliance Audits can be critical tools for businesses and facilities to mitigate risk and avoid business interruption and costly fines. Many businesses and facilities are unsure whether they are in compliance with EHS regulations, or may not realize they are out of compliance. Partner offers EHS Audits to identify non-compliance and to help mitigate risks to employees, occupants, the community, the environment, and business operations.

## A Tailor-Made Audit

When we perform a compliance audit, we design an approach that is specific to your objectives and your facility's unique needs. We select experienced senior auditors who are familiar with your industry and its EHS issues. We conduct independent reviews of facility operations to identify the EHS regulations that apply, evaluating your current compliance with these regulations. Typical compliance audits include:

OHSA will evaluate your EHS program performance. An outside perspective may be just the thing to identify gaps and recommend improvements.
